The Alcorn School Family Resource Center began in 1998 to support families in the community. The FRC offers family support services promoting parenting skills and family involvement with the schools, striving to help children succeed academically, socially and emotionally.

The FRC partners with the school to work with parents and the community helping to ensure that all children have the opportunity to develop to their full potential. Parents are their child's first and most influential teachers. All families have the power to become strong families. The Alcorn Family Resource Center believes that with a little guidance, parents and children can develop strong relationships that will give their child the best possible start in life.

The Alcorn School Family Resource Center proudly presents:

- Parent/child interactive playgroups
- Parenting education series
